Simple clothing, like shorts, shirts and bathing clothes, and casual shoes are advisable. For more chilly evenings we advise a pullover or a jacket. ### ELECTRICITY & WATER & ENVIRONMENT

There is electricity and water on board – but in limited amounts. All ships are equipped with 220 volt generators although they do not run all day (plugs like in Germany). The same applies to the air-conditioners which are featured on some ships. There is enough water in the water-tanks for several days but it should be spent carefully and rationally.

In order to protect and preserve the environment throwing any waste into the sea or into the toilet is strictly forbidden. **Please protect the environment!**

### BEDTIME SCHEDULE

Please ensure good night's rest after 11 p.m. Due to the insufficient acoustic insulation the passengers are kindly asked to respect each other's privacy.
